

ROLLER

Non-stick Coating

Zhejiang PFLUON New Materials Co., Ltd.

No. 66, North Huayin Road, High-tech Industrial
Park, Kecheng District, Quzhou, Zhejiang, China. P.C. 324000.

Innovation, better your life.

Emotion

W5434-2017P/M/T

Display your just right tenderness
even when life is tough.
Don't always feel depressed.
We have to learn
to reconcile with our emotions.

Amber

W5434-2040P/M/T

The color amber comes from the
winter ground and wood.
It makes us feel warm and happy,
leads our souls to nature
and pacifies our restless hearts.

INNOVATION, BETTER YOUR LIFE

Industry cornerstone, great power glory

Be the World-class Polymer Enterprise

Integrity, professionalism, openness,
cooperation and win-win

COLOR
BOARD

Berry

W5434-2009P/M/T

A natural tone.
It makes us feel being in a berry
jungle.
A gentle breeze sweeps over you
with a sweet taste.

COLOR
BOARD

Ruby Purple

W5434-2056P/M/T

A unique warm tone.
A fresh and youthful tint.
It indicates a youthful and happy
atmosphere
and inspires our hopes.

PFLUON

Zhejiang Pfluon Technology Co., Ltd., founded in 2006, is a raw materials manufacturing enterprise focused on the research and development of advanced materials and based in China with a global industrial layout. We have been focusing on the development and manufacturing of Advanced Polymers and their related applications for many years. Relying on innovation of product technology and upgrade of production equipment, we provide customers with high-quality solutions and high-quality product output. Pfluon always committed to be a world-class polymer enterprise.

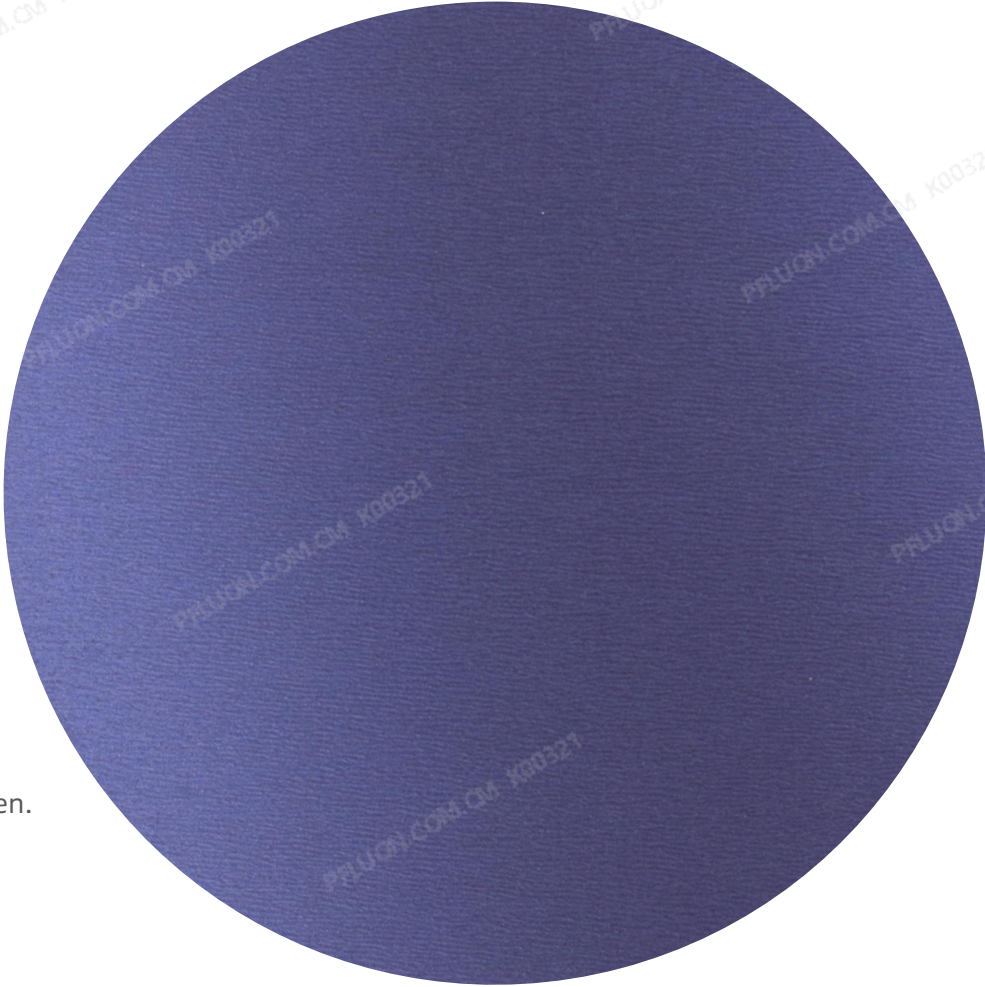

Monet's Garden W5434-2033P/M/T

Turn around to have a sweet dream.
Break into the fantasy world of oil painting.
In the world of light and shadows,
everything become hazy.

Romantic Purple W5434-2010P/M/T

After crashing into the painter's palette,
we feel like being in a big colorful garden.
Every beautiful thing is within an arm's reach.
It's so fantastic and unreal.

PFLUON

Our core products are diversified and represented by polyarylether resins, specialty coatings and biomaterials. They can be applied to aerospace, automobile, home appliance, electronic semiconductor, petrochemical, clean energy, medical equipment and other industries. Motivated by technological innovations and depending on excellent manufacturing quality, PFLUON is committed to providing customers with professional solutions and promoting win-win cooperation under the guidance of the market orientation.

Star And Sea Blue W5434-2032P/M/T

It was created with modern technology.
A surreal tint.
A typical electric blue tone.
It inspires our desire to explore the future
and reveals the secrete of future technology.

Eternity W5434-2057P/M/T

Neutral gray.
Modern and avant-garde.
It represents eternity, classics,
moderateness and pureness.

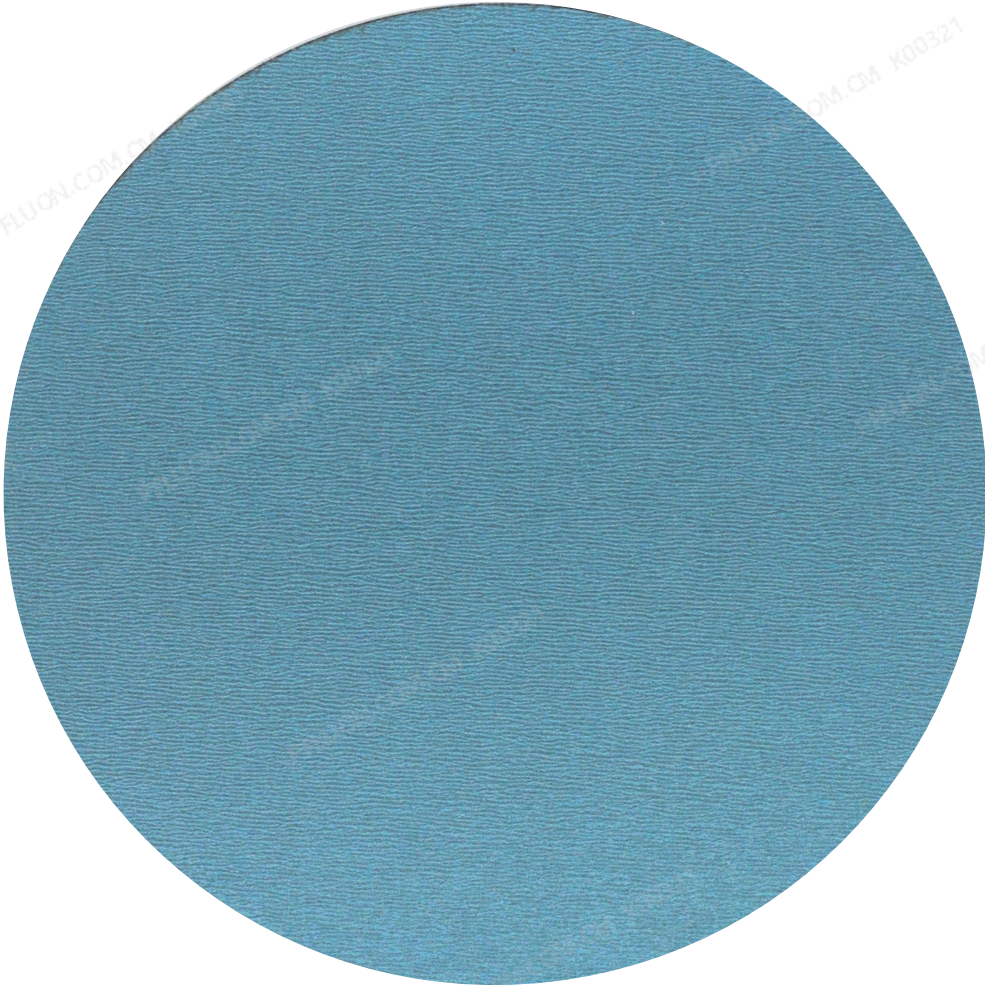

PFLUON

PFLUON highlights the building of a professional talent team and owns a first-class technical team, an independent research and development experiment base and a state-leading fully automatic production line. As a global leader in the field of new materials, PFLUON will continue to lead technological progress, promote deep applications of special polymer materials to various fields and increase the application value.

Outer Space W5434-2039P/M/T

An impressive visual impact.
It connects the past to future
and radiates time-resistant
pure and eternal charm.

Minimalism W5434-2058P/M/T

There are thousands of beauty.
In the fast paced life,
don't forget to maintain elegance.
Make the minimalism fashionable,
reasonable and steady.

R&D

The national high-tech enterprise, categorized into "3.3.1.1 Engineering Plastic Production" and "3.3.7.1 Paint Production" in the Classification of Strategic Emerging Industries (2018). In 2017, the "Zhejiang Key Enterprise Research Institute" was established and accepted, and a R & D Center was founded to develop a complete set of PEEK application technology. We have a strong R & D team consisting of several non-stick coating product development and application experts with over 15 years of relevant experience. Additionally, we have established a good industry-university-research cooperation relationship with Zhejiang University, Zhejiang University of Technology, and Quzhou University, and make our full efforts to improve our core competence through the research and promotion of new products, new processes, and new technologies.

We mainly participated in drafting and modification of the national standards of the Performance and Test Methods of Non-Stick Surface of Domestic Metal Cooking Utensils for Household Food and Aluminum and Aluminum Alloys Nonstick Cookware, and led the drafting of the industrial standard Non-stick Coatings and the group standard Water-base Fluororesin Non-stick Coatings.

COLOR
BOARD

Lime Green

W5434-2037P/M/T

Neither bitter nor astringent,
it looks like sunlight, air and breezes.
A little sweet taste
always reminds us of the beauty of our life.

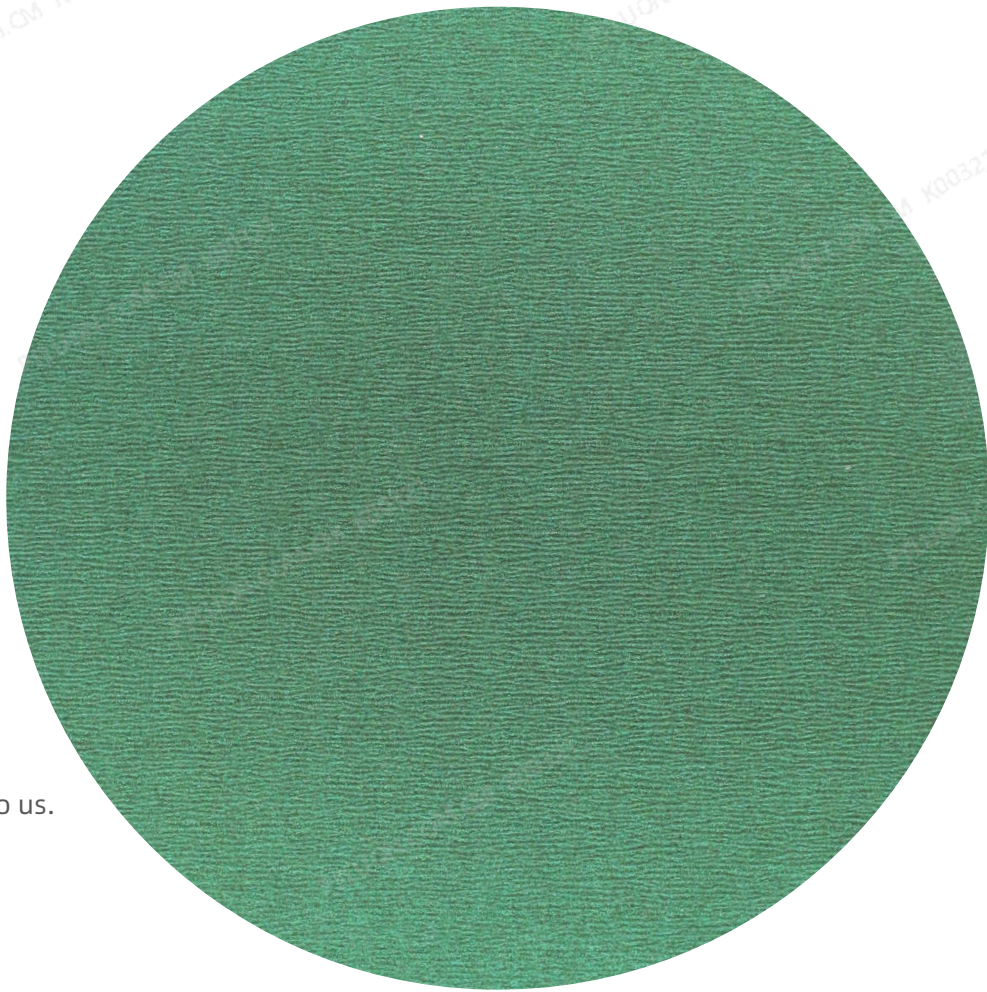

COLOR
BOARD

Mint Green

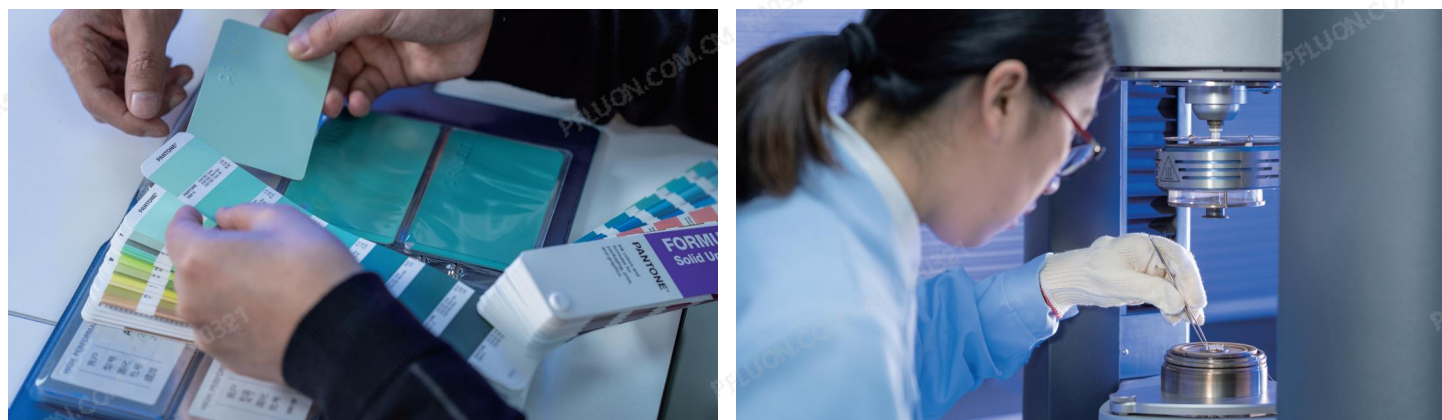

W5434-2061P/M/T

It looks like mint leaves.
Without a cool sense of emerald green,
it delivers warmth, health and sunlight to us.
After neutralizing warm colors,
what catches your eyes is the color of
spring.

QUALITY

We have been rewarded the ISO14001:2015 environmental management system certification, ISO9001:2015 quality management system certification and OHSAS18001:2007 occupational health and safety management system certification. In addition, we are a regular partner of SGS/TUV to ensure the safety of foods when contacting the coating. The world-leading fully automated system of non-stick coating production lines can ensure the stable quality, and the client can provide the full-progress quality guarantee for customers in the whole construction procedure.

Sunset

W5434-2011P/M/T

When the sun sets,
the afterglow fills the sky.
Life is always in a hurry,
but do not miss this sunset.

Autumn Drama

W5434-2038P/M/T

It seems that the hot summer stops suddenly
and fields are covered with a new golden coat.
After falling leaves say goodbye to their
audiences,
a new story is emerging.

SERVICE

The optimization and innovation of the service mode is the same important as the R&D and quality control. PFLUON provides the “Optimization solution service” for customers, namely a complete set of non-stick coating service system, including the project feasibility analysis, production process control, and product parity system. The 3-in-1 service provides quick production efficiency solutions for customers. We aim to provide high-quality and stable non-stick coating products for customers to further improve the quality of our comprehensive services in the end.

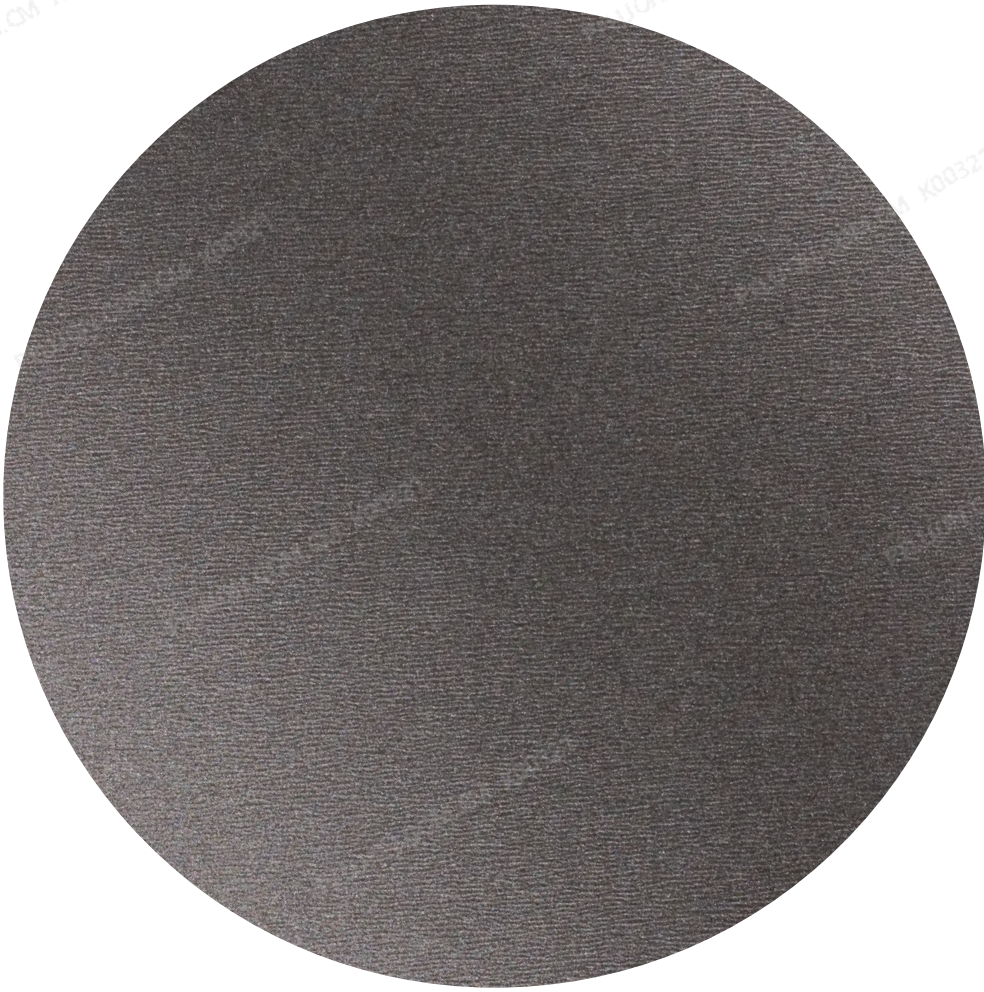

Mocha W5434-2059P/M/T

A rich brown tone.
It looks like a warm cup of coffee
or cream on a chocolate cake.
It can pacify our souls
and relieve our fatigue after a busy day.

Golden Brown W5434-2054P/M/T

A warm color.
It brings strong autumn and winter
breath to us.
A low-key sense of luxury
reveals a fashionable and retro flavor.

PFLUON OPTIMAL COLLECTION is a free applet created by Zhejiang Pfluon New Materials Co., Ltd. We use intuitive 3D effect to provide customers with a more convenient color selection. We digitized electronic color cards from our color palette library and apply them in this mini program. In the PC, PAD and mobile, we provide intuitive color data and hundreds of thousands of collocation. Optimal Collection can not only give customers a perfect visual experience, but also give the information they want without going outside. As the first non-stick paint company to create this small program, we have always insisted on customer orientation to simplify the complicated sampling process, making it fast and easy. When customers get overwhelmed by big data, they can communicate with colors personally.

COLOR BOARD

Night

W5434-2060P/M/T

Night does not mean complete darkness.
Go away from the hustle and bustle of the city
and let the moon light replace all lights
to explore the mystery of the night.

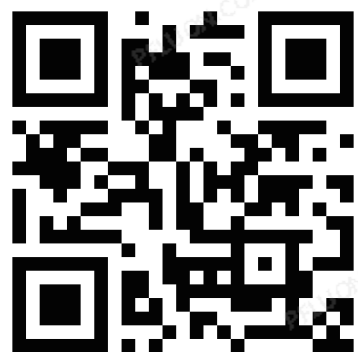

COLOR BOARD

Traditional Black

W5434-2031P/M/T

Both the calligraphy and painting
are closed related to the black aesthetics.
It represent a complete oriental style
after thousands of years of development.
